TASK 2: Tooltips

Step 1: Create Tooltip Page

The screenshot displays the Microsoft Power BI Desktop application. The top ribbon includes tabs for File, Home, Insert, Modeling, View, Optimize, and Help. A 'Share' button is located in the top right corner. Below the ribbon, a toolbar contains icons for various actions like Save, Refresh, and Publish. The main workspace is a large gray area with a central white box containing the text 'Build visuals with your data' and a small icon of a report card. On the right side, there are two panels: 'Visualizations' and 'Data'. The 'Visualizations' panel shows a 'Format page' section with a search bar, a 'Reset to default' button, and a 'Canvas settings' section with dropdowns for 'Type' (set to 'Tooltip'), 'Size' (set to '400 x 300 (Multiple ...)'), and 'Vertical alignment' (set to 'Middle'). The 'Data' panel shows a search bar and a list of fields from the 'power_bi_dataset': CustomerName, OrderID, ProductName, Quantity, and TotalAmount. At the bottom, a task bar shows three pages: 'Main Page', 'Product Details', and 'Product Tooltip' (which is the active page, indicated by a green bar and a plus sign). The bottom status bar shows 'Page 3 of 3' and a zoom level of '100%'.

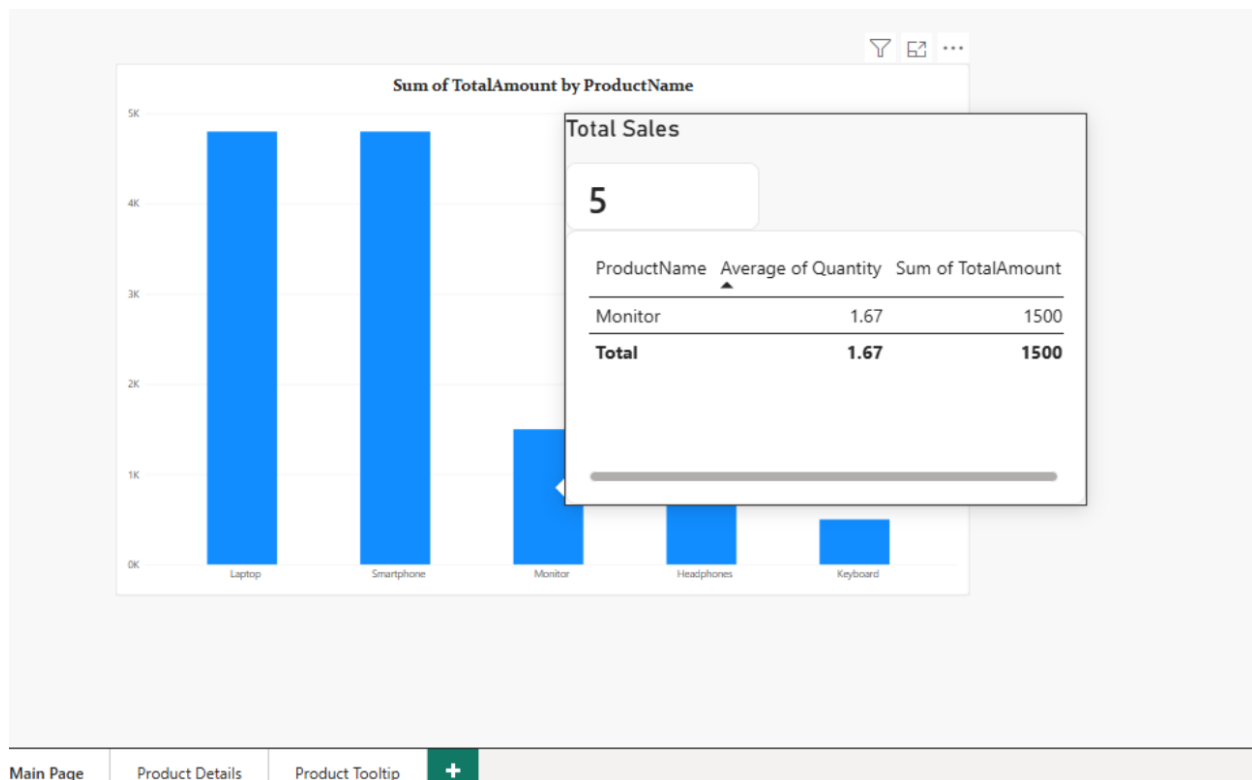

Step 2: Add Tooltip Visuals

The screenshot shows the Power BI Desktop interface. The main canvas displays a tooltip visualization titled "Sum of Total Sales" with a value of "13K". Below the title is a table with the following data:

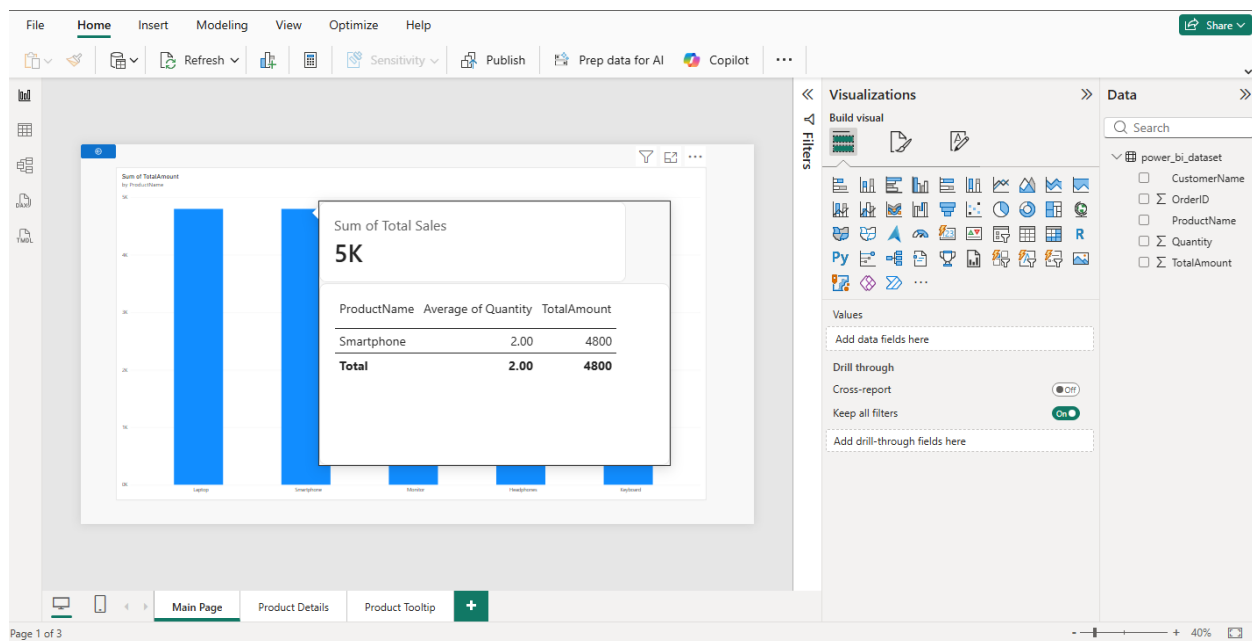

ProductName	Average of Quantity	TotalAmount
Headphones	3.00	1350
Keyboard	3.33	500
Laptop	1.33	4800
Monitor	1.67	1500
Total	2.27	12950

The right-hand pane shows the "Visualizations" and "Data" sections. The "Visualizations" pane includes a "Build visual" section with various chart types and a "Columns" section with the following fields: ProductName, Average of Quantity, and TotalAmount. The "Data" pane shows the "power_bi_dataset" with the following fields: CustomerName, OrderID, ProductName, Quantity, and TotalAmount. The "Tooltip" section in the "Visualizations" pane is set to "Keep all filters" and has a "Drag tooltip fields here" area.

Page 3 of 3

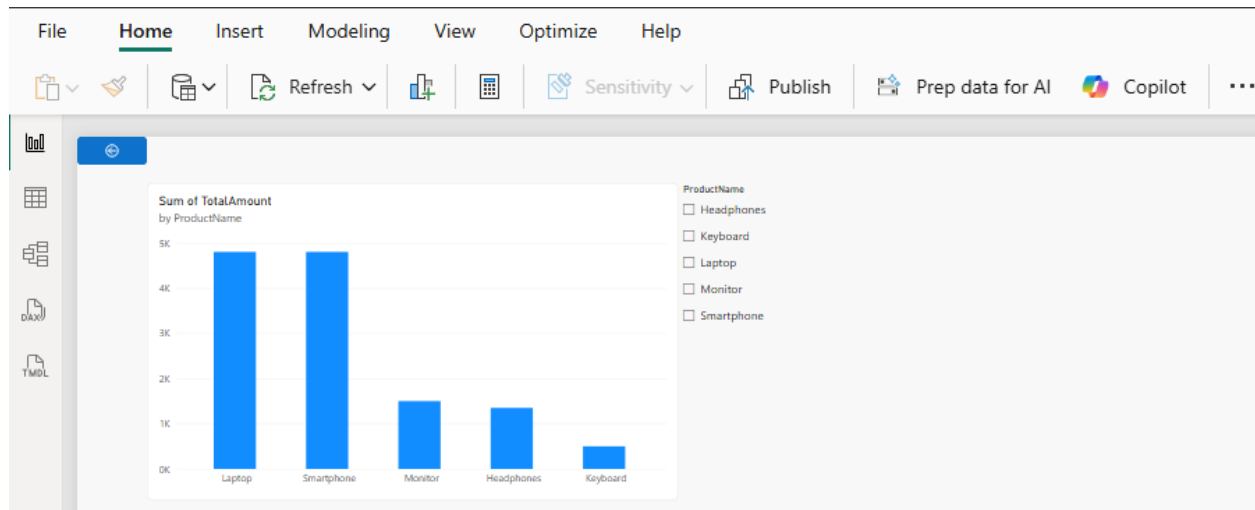

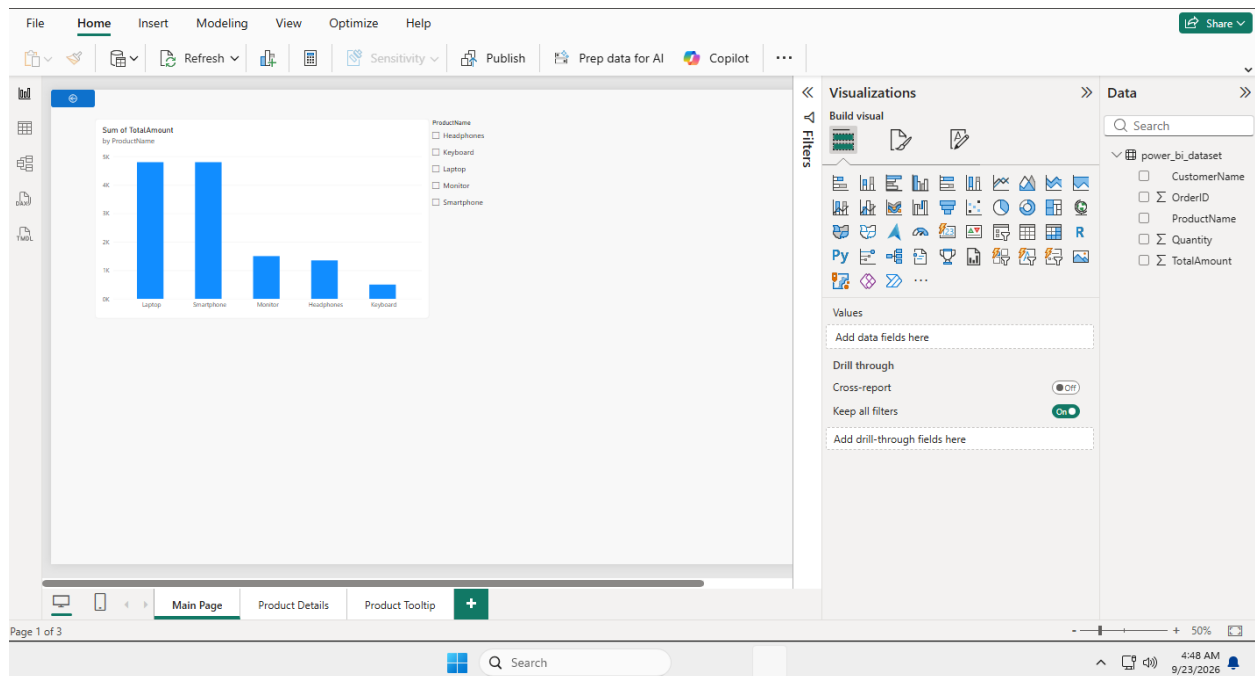

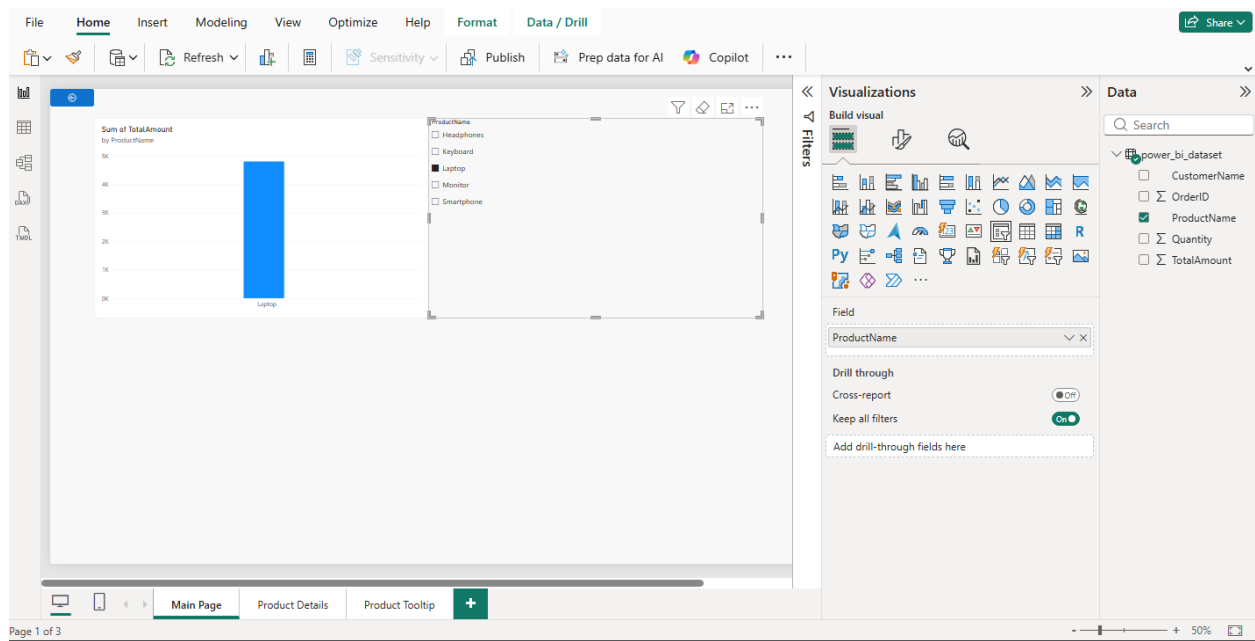

Step 3: Link Tooltip to Main Chart

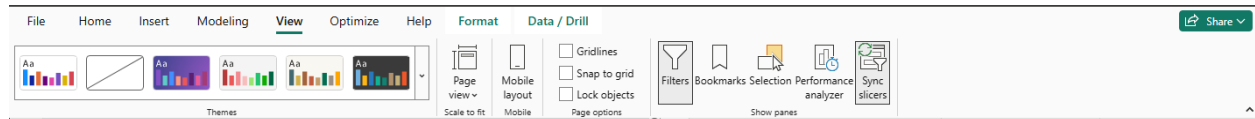

Task 3: Sync Slicers

Step 1: Create Slicer on

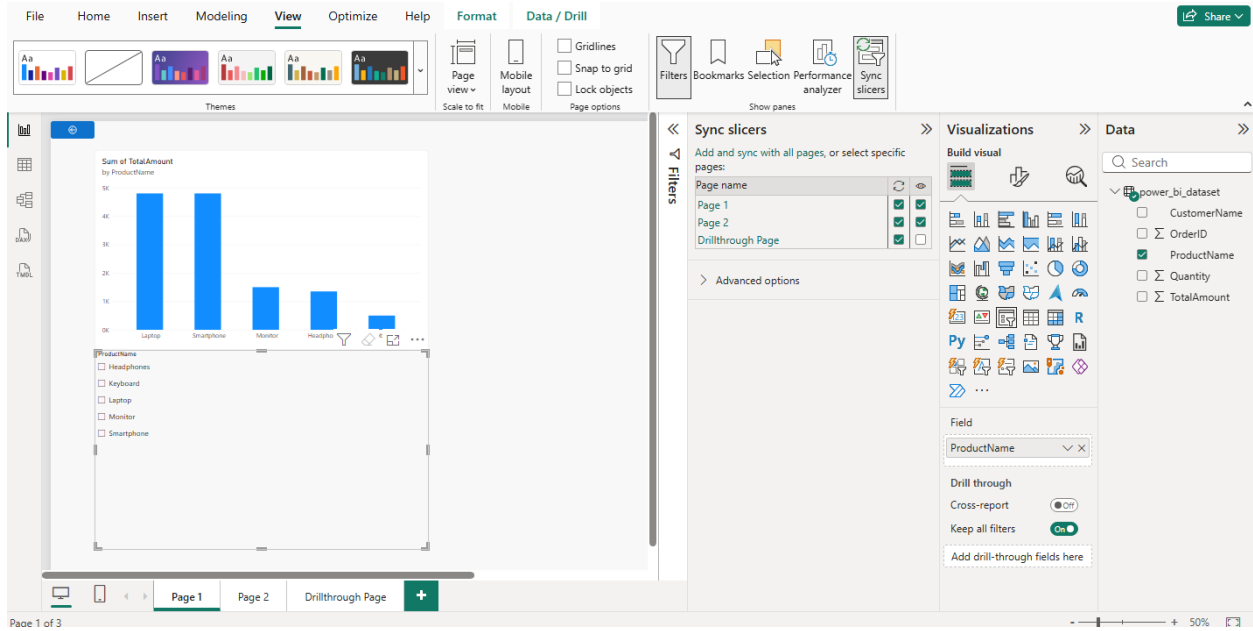

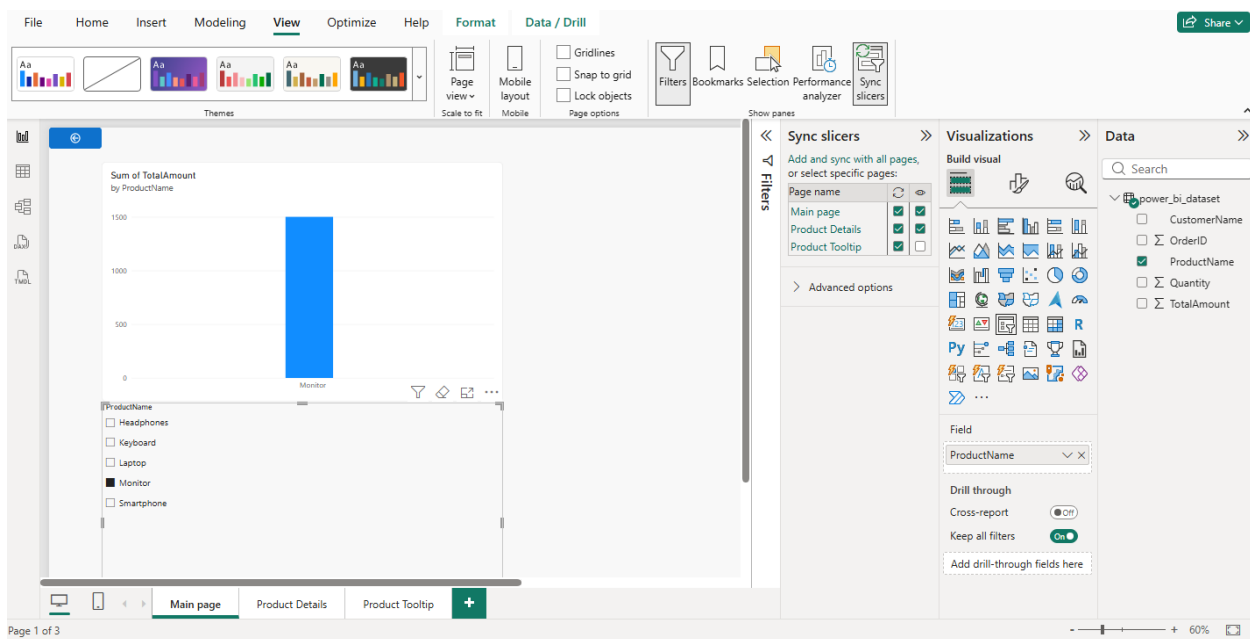

Step 2: Enable Sync Slicers

Step 3: Open & Configure Sync Slicers

Step 4: Test Sync
