

The screenshot shows a VS Code editor window with a file explorer on the left. The file explorer shows a folder named 'file_handling_lab' containing 'data', 'example.txt', and 'lab.py'. The 'lab.py' file is open in the editor. The code in 'lab.py' is as follows:

```
1 import os
2
3 # 1. Write, Read & Append (3 marks)
4 with open("example.txt", "w") as f:
5     f.write("Hello, File Handling in Python!\nThis is the second line.\n")
6
7 with open("example.txt", "r") as f:
8     print(f.read())
9
10 with open("example.txt", "a") as f:
11     f.write("This line is appended.\n")
12
13 # 2. Line-by-Line Reading (2 marks)
14 with open("example.txt", "r") as f:
15     for line in f:
16         print(line.strip())
17
18 # 3. File Paths & Directories (2 marks)
19 os.makedirs("data", exist_ok=True)
20
```

The terminal output shows the execution of the code:

```
Hello, File Handling in Python!
This is the second line.
This line is appended.
True
['info.txt']
File not found!
Permission denied!
PS C:\Users\Docke\Downloads\file_handling_lab>
```

23
24 print(os.path.exists("data/info.txt"))
25 print(os.listdir("data"))
26
27 # 4. Exception Handling (2 marks)
28 try:
29     with open("non_existing.txt", "r") as f:
30         print(f.read())
31 except FileNotFoundError:
32     print("File not found!")
33
```

The terminal output shows the execution of the code:

```
Hello, File Handling in Python!
This is the second line.
This line is appended.
True
['info.txt']
File not found!
Permission denied!
PS C:\Users\Docke\Downloads\file_handling_lab>
```

The screenshot shows the Visual Studio Code interface. The Explorer sidebar on the left shows a project named 'file_handling_lab' with files 'data', 'example.txt', and 'lab.py'. The 'lab.py' file is open in the editor. The code in 'lab.py' is as follows:

```
lab.py
25 print(os.listdir("data"))
26
27 # 4. Exception Handling (2 marks)
28 try:
29     with open("non_existing.txt","r") as f:
30         print(f.read())
31 except FileNotFoundError:
32     print("File not found!")
33
34 try:
35     with open("/root/secure.txt","r") as f:
36         print(f.read())
37 except (PermissionError,FileNotFoundError):
38     print("Permission denied!")
```

The Terminal panel at the bottom shows the output of running the script:

```
Hello, File Handling in Python!
This is the second line.
This line is appended.
True
['info.txt']
File not found!
Permission denied!
PS C:\Users\Docke\Downloads\file_handling_lab>
```

The screenshot shows a terminal window with the following output:

```
Hello, File Handling in Python!
This is the second line.
This line is appended.
True
['info.txt']
File not found!
Permission denied!
PS C:\Users\Docke\Downloads\file_handling_lab>
```

The screenshot shows the Visual Studio Code interface. The Explorer sidebar on the left shows a project named 'file_handling_lab' with files 'data', 'example.txt', and 'lab.py'. The 'example.txt' file is open in the editor. The content of 'example.txt' is as follows:

```
example.txt
1 Hello, File Handling in Python!
2 This is the second line.
3 This line is appended.
4
```

The Terminal panel at the bottom shows the output of running the script:

```
Hello, File Handling in Python!
This is the second line.
This line is appended.
True
['info.txt']
File not found!
Permission denied!
PS C:\Users\Docke\Downloads\file_handling_lab>
```
